- Groq API
- Android Studio
- Azure Web Apps

PROFILE

Final year Computer Science and Information Systems student at Wits, passionate about building practical software solutions that solve real-world problems.

EDUCATION

University of the Witwatersrand Current
BSc Computer Science & Information Systems | Final Year

Clydesdale Senior Secondary School 2023
Grade 12 — Mathematics, Physical Science, Life Science, Agricultural Science

ACADEMIC COURSEWORK

Information Systems

- Structured and analyzed data using Microsoft Excel to identify trends and performance issues.
- Applied systems analysis techniques to identify client problems and propose effective solutions.
- Created system models: Use Case, Activity, Sequence, and State Diagrams.
- Group project: Student Funding Management System — system analysis, design, and development.

Business Process Analysis (Current)

- Researched impact of Agentic AI in process-centric organizations.
- Evaluated automation benefits and associated risks; applied Ishikawa (Fishbone) root cause analysis.

PROJECTS

Personal Portfolio Website

HTML / CSS / JavaScript

- Designed and developed a personal portfolio website to showcase projects, skills, and academic background.
- Responsive layout for clean presentation across devices.

<https://msiyaynwa2005.github.io/MzothandoMsiyaPortfolio/>

TrackRank — Student Performance Tracker

HTML / CSS / JavaScript / Firebase Firestore / Express.js / Groq API

- Web-based system for teachers and students to track academic performance and identify top students per term.
- AI-powered career suggestions using Groq API with personalised student guidance.

<https://github.com/MsiyaYNWA2005/TrackApp.git>

ScholarSync — Student Funding Management System

C# / .NET WinForms / Microsoft SQL Server / Rule-based AI Engine

- Desktop application managing student funding including tuition, accommodation, and living expenses.
- Administrator dashboard for eligibility verification, approvals, and analytics monitoring.
- Local rule-based AI chatbot for system guidance operating fully offline.

<https://github.com/mahlatseclayton/ScholarSync.git>

SmartClinic

JavaScript / Node.js / Firebase Firestore / Azure Web App

- Scrum Master of The Team AidAspire.
- Web application helping users find nearby healthcare facilities by location, clinic name, and services.
- Allows patients to manage appointments online; deployed on Azure Web App.

<https://github.com/khavi22/smartClinic.git>

ChatOnVibes — Social Chat Mobile App

Java / Android Studio / PHP / MySQL / XAMPP / Postman

- Native Android app with real-time chat, friend requests, OTP email verification, and status updates.

- Editable user profiles with bios and profile pictures; PHP/MySQL backend on Wits LAMP server.

<https://github.com/mahlatseclayton/WOOFERS.git>

Clydesdale Certificates Management System

HTML / CSS / JavaScript / Express.js / Firebase Firestore

- Web-based system to digitally replace manual book registration for matric certificate collection.
- Enables admins to register and search student data by unique exam number; eliminates data loss risk.

<https://github.com/MsiyaYNWA2005/CLYDESDALE.git>

WCC Project — Windows Forms Desktop App

C# / .NET / Windows Forms / Microsoft Access / Visual Studio 2022

- Built a Windows Forms desktop application demonstrating core GUI development skills.
- Integrated Microsoft Access database enabling data input and querying.
